Acknowledgements

Thanks to Dr Jennie Harré-Hindmarsh of Ngāti Porou Hauora and Shirley Keown of Turanga Health for their generous help with finding their organisations’ research articles and other local material, also Dr Sue Pullon of University of Otago Wellington for the Tairāwhiti Interprofessional Education Programme research output, and summer studentship reports. Grateful thanks to Jennie for her meticulous proofreading.

Introduction

This bibliography does not claim to be exhaustive — no doubt older unpublished reports wait to be rediscovered and a few published articles may have been missed. It has been compiled mainly in my own time and grew from a desire to maintain a list of publications and theses by staff of the then Tairāwhiti District Health, and encourage research. It made sense to include the significant research output from the universities of Auckland and Otago in collaboration with Ngāti Porou Hauora Charitable Trust and Turanga Health, so this morphed into a regional bibliography.

I have particularly tried to collect unpublished reports and theses as they are harder to discover, and find in full text. Unfortunately there wasn’t time to include every relevant news article in publications such as Kai Tiaki and Nati Link, or conference presentations. Some articles in this list give Gisborne Hospital as an author’s affiliation but are not about Tairāwhiti. They are included but not all indexed. Epidemiological articles and reports with a national focus were only included where there was something significant concerning Tairāwhiti. Reports and plans by Hauora Tairāwhiti and its predecessors that were readily available on http://tdh.org.nz or held by our Library appear in this list; there must be many others. Any errors or omissions are my own.

Copyrights permitting, reports, theses and articles are archived in the Library of Hauora Tairāwhiti. Copies can be requested from the Learning Centre Manager, Hauora Tairāwhiti, PO Box 7001, Gisborne 4040, clinical.library@tdh.org.nz. We would be grateful to receive reports, theses and articles missed from this list, and any future Tairāwhiti-related publications. It is to be hoped that these resources will eventually be searchable via a fully indexed online database.

Patricia Sheehan
